Customer Problem Statement

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	HR / ServiceNow administrator	Import employee data from an external spreadsheet	Manually creating records is slow and repeated imports can create duplicates	Employee data must be mapped consistently and a unique field must identify existing records	I want a reliable bulk-import process with clear validation results.
PS-2	ServiceNow administrator	Update existing employee records when new spreadsheet data arrives	The same Employee ID may appear again with changed Name/Email values	A Transform Map with Coalesce can match existing records	I need repeated imports to update records instead of creating duplicates.
