Problem-Solution Fit

Date	01 October 2026
Team ID	SWTID-2026-8578
Project Name	Import Data using Transform Maps
Maximum Marks	5 Marks

Problem-Solution Fit Canvas

Area	Project-specific content
1. Customer Segment(s)	HR operations users and ServiceNow administrators managing employee records.
2. Problems / Pains + Frequency	Manual or repeated spreadsheet imports can be time-consuming and may create duplicate records.
3. Triggers to Act	New employee spreadsheet arrives or existing employee information changes.
4. Emotions Before / After	Before: concern about import errors and duplicates. After: confidence from Transform History and validated records.
5. Available Solutions – Pros & Cons	Manual record creation: simple but slow. Spreadsheet import without Coalesce: faster but duplicate risk. Transform Map + Coalesce: structured bulk import with duplicate prevention.
6. Customer Limitations	Depends on ServiceNow access/roles and correctly structured spreadsheet data.
7. Behavior + Intensity	Regularly prepares/imports employee data; repeated imports make duplicate prevention important.
8. Channels of Behavior	Online: Google Sheets/Excel and ServiceNow. Offline: spreadsheet preparation and review.
9. Problem Root / Cause	Source and target fields require mapping, and repeated Employee IDs need a reliable matching rule.
10. Your Solution	ServiceNow Import Set + Transform Map + Coalesce + validation reports/dashboard.
