Code-Layout, Readability and Reusability

Date	01 October 2026
Team ID	SWTID-2026-8578
Project Name	Import Data using Transform Maps
Maximum Marks	5 Marks

Because the documented solution is primarily ServiceNow configuration, the checklist is interpreted as configuration/layout quality rather than a conventional source-code project.

S.No	Quality Parameter	Followed	Remarks
1	Consistent naming	Yes	Employee Test / Employee Import / Sample Spreadsheet Import use consistent names.
2	Proper configuration structure	Yes	Import Set, Transform Map, Field Maps, Reports and Dashboard are separate configuration objects.
3	Meaningful field names	Yes	Employee ID, Employee Name, Email, Department and Location are descriptive.
4	Clear mapping names	Yes	Source and target fields are explicitly mapped.
5	Documentation	Yes	Step-by-step workflow and validation are documented.
6	Modular design	Yes	Import, transformation, validation and reporting are distinct stages.
7	No redundant configuration	Yes	Repeated imports are handled through Coalesce rather than duplicate target records.
8	Error/validation handling	Yes	Transform state/history is checked after import and transform.

Reusable Components / Configuration Objects

Component	Technology	Where Reused	Reusability
Employee Import	ServiceNow Import Set	Repeated spreadsheet imports	High
Sample Spreadsheet Import	ServiceNow Transform Map	Repeated transformations	High
Employee ID Coalesce	Transform Map Field Map	Repeated imports for matching	High
Employee Analytics Dashboards	ServiceNow Dashboard	Ongoing employee data monitoring	Medium
