Performance Testing

Date	01 October 2026
Team ID	SWTID-2026-8578
Project Name	Import Data using Transform Maps
Maximum Marks	5 Marks

Testing Overview

Field	Details
Testing Tool Used	ServiceNow Transform execution and Transform History (the supplied project document does not specify JMeter/Locust/k6).
Type of Testing	Functional import validation and repeated-import/coalesce validation.
Target Module / API	Employee Import → Transform Map → Employee Test.
Test Environment	ServiceNow instance used for the project.
Test Date	01 October 2026

Test Scenarios

S.No	Scenario	Rows / Users	Expected Outcome
1	Initial employee spreadsheet import	As supplied in source sheet	Records created in Employee Test.
2	Repeated import with same Employee IDs but changed Name/Email	4 rows in documented example	2 new records inserted and 2 existing records updated.
3	Repeat the same sheet again	4 rows	0 inserted, 0 updated and 4 ignored according to the source document.
4	Transform History validation	Each import run	State shows Completed/Success and history shows row outcomes.

Performance Test Results

Metric	Target	Actual	Status	Remarks
Response Time (Avg)	< 2 sec	Not provided	Not measured	Source document does not report timing.
Response Time (Max)	< 5 sec	Not provided	Not measured	Source document does not report timing.
Throughput	Not specified	Not provided	Not measured	No throughput figures are supplied.
Error Rate	< 1%	Not provided	Not measured	Source document reports successful completion but no numeric error rate.
CPU Utilization	< 80%	Not provided	Not measured	No infrastructure metrics supplied.
Memory Utilization	< 80%	Not provided	Not measured	No infrastructure metrics supplied.

Observations & Analysis

The supplied project document provides functional validation rather than numeric performance benchmarks. It specifically demonstrates successful transformation and Coalesce behaviour for repeated employee imports.
